### 1: CALCULATING YOUR DISCOUNT

Discounts should be calculated on the Total Of Products Ordered before taxes or shipping charges are applied. We offer increasing discounts based on the number of units or bottles you purchase regardless of the bottle size. Count up the number of units or bottles you are ordering to find your discount on the table to the right.

Discounts apply to all items. Seniors take an additional 10% discount. Seniors must provide a clear copy of a picture ID to qualify for the senior citizens' discount.

Tip: If you are ordering a kit containing 3 bottles, be sure to count all 3 bottles to get your discount.

#### Table Of Discounts

5% discount on any 8 to 15 items  
(0.05 x cost of items)

10% discount on any 16 to 23 items  
(0.1 x cost of items)

15% discount on any 24 or more items  
(0.15 x cost of items)

### 2: CALCULATING SALES TAX (TEXAS ONLY)

Taxes should be calculated on your Discounted Total. The state of Texas requires us to charge 8.25% on all sales within the state. If your shipping destination is within the state of Texas, take your Discounted Total and multiply by 0.0825 to arrive at your sales tax amount. Round up to the nearest penny.

### 3: CALCULATING YOUR SHIPPING & HANDLING CHARGES (Revised 2/1/12)

Shipping and handling charges should be calculated on the **Total Of Products Ordered** before any discounts are applied. Shipping is not taxable. The rates below are for the contiguous 48 states.

For Alaska, Hawaii, and all other destinations or for very heavy shipments, additional shipping charges may apply.

Air mail and overseas charges, taxes, and duties may be billed separately.

Shipping charges are subject to change without notice.

| Total Of Products Ordered | Shipping     |
|---------------------------|--------------|
| \$ 0.01 ----- \$ 30.00    | add \$ 7.95  |

## A LETTER FROM OUR VICE-PRESIDENT

My family has been in the hair loss prevention and hair growth business for several decades. I became involved through the manufacturing end of the company. In all the years I've been with Loesch Laboratories I've been asked one question more than any other. Clients will often ask me "What's the best piece of advice you can give me?" By far, the best advice I can give is BE CONSISTENT. We've designed our Original and Professional systems to do the job gradually over many months' time. After all, the worst thing you can do to a sick follicle is bathe it in harsh chemicals. Many other so-called "magic hair growth serums" state in their fine print that "...some accelerated hair loss during treatment is normal." Now, really. How stupid do they think we are?

**Consistent, daily use is the key to getting the best results per dollar spent.** No treatment program can work while it's sitting on a shelf. We sometimes have clients who will call our consultants in a panic. They may have stopped the program and a month later started losing lots of hair. **Don't slide backward in your treatment.** After the first month of daily use, cutting back to 3 or 4 times a week will help maintain your hair in a status quo situation but it takes more frequent use to wake those follicles up and keep them awake. It's your money that you are spending and I want you to get the most out of every penny.

I'm also questioned often by guys who have shaved their heads because of thinning hair. While it's much more socially acceptable these days to have a shaved-bald head it is still the dominant preference to have a full head of hair. These guys will often ask "What good is a hair growth system if I shave my head?" The answer's simple. Just because hair isn't allowed to grow long doesn't mean it isn't growing. Guys who shave their heads can use the Loesch Hair Growth System for 6 months and then let their hair grow out fuller and thicker than it's been in years.

Do yourself a favor. **Stick with the program** and you'll continue to be happy with the results.

W. T. Loesch III, Vice-President
